

HTML Week 1 – Kick start

- Step 1: Create a folder named “Webpages” in your **H:// drive** [network drive starting with your Student ID] after logging in to the computer.
- Step 2: “Search programs and files” type “**Notepad++**”. Open Notepad ++. **If you cant find Notepad ++ you can use just old school Notepad**
 - Mac user search for a free app – Text Wrangler
- NB. The above is for when you are in the labs, at home it will be slightly different.
- Step 3: Type the following code into the notepad++

<html>

<head>

<title>

Welcome

</title>

</head>

<body>

<h1>Welcome to My Page</h1>

</body>

</html>

- Step 4: Save the file
Click on **File** tab → **save as** → Change the destination from default folder to the **Webpages** folder in your H:// drive. Save the file with the name “**Mypages.html**”.
Once you save the file, you can find an **IE**(Internet Explorer) file in the folder. Click on the file and it opens in a Browser.
- Step 5: The highlighted pair of tags **<html>**, **<head>** and **<body>** are used only **ONCE** in a page. While rest of the HTML tags can be used any number of times.
- Step 6: Type the following lines inside the pair of **<body>** tags and save the file.

<P> This is the tag used to write a paragraph

</P>

<p> Some of the formatting tags used in a paragraph are:**

**

**** This text is in bold**
**

<u> This text Is underlined**</u>
**

<i>This text is in Italics **</i>**

This text uses all formatting tags

After saving the notepad++ file, open the explore file in a browser to see the output.

- Step 7: How To insert an image. Search for any image from Google and save it in the same folder having your HTML Pages. Type the following lines inside the pair of **<body>** tags after the paragraph and save the file.

Format to insert an image is ``

Say, I have an image of a flower named flower1 and of type JPEG format. The following line is used inside the pair of **<body>** tags to insert the image.

``

- Step 8: Make a new page "**My page2.html**" in the Webpages folder. Follow Step 3 and Step 4
- Step 9: How to create a table

```
<table border="1">
<tr>
<th>Number</th>
<th>Name</th></tr>
<tr>
<td>1</td>
<td>Sam</td></tr>
<tr>
<td>2</td>
<td>Mark</td></tr>
</table>
```

Step 9: How to create a list

```
<br><br>
<h2>Ordered List</h2>
<ol>
<li>Audi </li>
<li>BMW</li>
<li>Mercedes</li>
</ol>
```

```
<br><br>
<h2>Un Ordered List</h2>
<ul>
```

```
<li>Audi </li>
<li>BMW</li>
<li>Mercedes</li>
</ul>
```
